

## Installation Instructions Deck Tiles

### Recommended Tools:

**Dead Blow Mallet**  
**Table Saw**  
**Building Square**  
**Tape Measure**  
**Marker**  
**Gloves**

Suggested starting point is the outside edge with a full tile the loops towards the face of the bldg, and the opposite side of the deck

Leave out tiles that need to be cut

After all full tiles are installed make the necessary cuts around obstructions. The last row of tiles toward the bldg. may need to be cut in order to fit. Leave a 1/4" gap around the outside perimeter of the covered area for expansion and contraction.
